

Help Desk Supervisor

As part of the agency's IT Department the Help Desk Supervisor is fully responsible for the efficient functioning of the agency IT Help Desk and supervision of the staff in that unit. Utilizing the IT Service Operations part of the ITIL and Service lifecycle, the ServiceDesk manager is a point of escalation and expeditor for service delivery. The employee provides oversight to ensure all incidents and service requests are logged, triaged properly and worked to completion with the service level agreements, to include off-shift and holiday coverage. The employee will report-out key performance indicators to demonstrate the team is following the incident management process for all incidents. They help positively lead the department as a member of the IT Management team.

This position supervises a unit of information technology staff whose primary duties involve: performing diagnostics, replication and triage of customer issues for IT services, installation of computer programs and support of agency issues devices. They collaborate with management and technical staff involved in development of complex and specialized programs or agency projects, assign and prioritize work, evaluate staff performance, review IT environmental documentation, orient and trains new staff and/or recommend training seminars/classes for staff. They assist staff in resolving difficult computer problems and answer technical questions; establish and enforce unit policies and procedures; ensure programming standards are followed and conduct staff meetings.
