

Assistant Director of IT

As part of the agency's IT Department, the Assistant Director of IT functions as the assistant to the IT director and is an IT leader for the management team. This position supports and drives the technical work for completion of projects as well as production support. This role serves as a partner with the IT director and an innovator, guiding agency roadmaps and future efforts including, but not limited to, architecture, governance and change control, IT security, systems update and maintenance. The employee also completes change control code reviews for the technical staff and ensures all CCR follow the ITIL risk mitigations processes.
